-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: In claim 1, line 16, it appears that "the door or doors" should be replaced with –said at least one of the doors-- . Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Galvis '054 in view of Laughlin '071. Galvis discloses a hand-operated gatherer comprising a shaft 14 having a first (at 16) and a second (at 12) end, a basket tool assembly (area of reference numeral 16) having a frame member 85 and a pair of doors 80 with means (as seen in figures 5 and 6) to bias the doors in a closed position and a handle assembly (generally 12) attached at a second end of the shaft (as seen in

Art Unit: 3671

figures 1 and 2), the handle assembly having a grip 24 and a trigger 25 pivotally attached to the grip (via pin 27). Further, Galvis discloses the gatherer having a control linkage 46 being attached to the doors (via 51) and to the trigger (via 48) but fails to show the use of wire bails. However, Laughlin teaches that it is well known to employ such bails (generally 40) in concert with gathering type devices 12. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide the gatherer of Galvis with the bails as taught by Laughlin in order to provide a gatherer having greater operational range, use and effectiveness.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert E Pezzuto whose telephone number is (703) 308-1012. The examiner can normally be reached on 7:00 am to 5:00 pm.
